

QUALITY POLICY

Renvolt is committed to delivering transparent, reliable, and high-quality EPC and O&M services that ensure the long-term sustainable performance of renewable energy assets. This quality Policy supports our **business** strategic direction and reflects our ambition to be the preferred long-term partner.

Our Quality Management System is aligned with Renvolt's core values **of Transparency & Partnership, Quality & Reliability and Ethics & Integrity**. These values guide how we deliver our services and how we continuously improve our performance.

Quality Commitments

Renvolt commits to:

- Complying with contractual, legal and regulatory requirements.
- Communicating openly, accurately and professionally with stakeholders to strengthen customer satisfaction and service excellence.
- Ensuring that employees have the competencies, training, and resources needed for sustainable performance.
- Operating with standardized, continually improved processes aligned with ISO 9001, supported by risk-based thinking and data-driven performance monitoring.

Management Commitment

Top Management ensures that this Policy is communicated, understood, and applied throughout the organization. Management provides the necessary resources and drives the continual improvement of the Quality Management System.

"Quality is how we build long-term partnerships and sustainable performance."

This Policy guides the definition and review of quality objectives.

Renvolt,
